

WHAT WE DO

We build a stable and flexible operating system, providing you a platform to get things done. Our tools are innovative, unique and open, supporting other Linux distributions and making complicated things easy.

WORKING TOGETHER

We believe in the freedom to create technology that will better everyone. We also believe in collaborating with others and having fun while doing it.

BEING THERE FOR YOU

Whether you're a new user looking for help or an experienced developer looking to cross-compile and distribute software, openSUSE provides the tools and support you need.

Meet us at openSUSE.org

WELCOME TO
openSUSE

FOR USERS

With openSUSE you can easily design graphics, create documents and videos or surf the Internet. Hundreds of applications are included and thousands more up-to-date tools are just a click away. It's a desktop ready for the most demanding user.

FOR DEVELOPERS

With unparalleled stability, flexibility and up-to-date versions of all the relevant tool chains and libraries available on the Open Build Service, we strive to give you the best Linux for building software for the future.

FOR ADMINISTRATORS

openSUSE fulfills all your networking, management and maintenance needs for the home or small enterprise. Create a mail, web or file server. Manage user accounts. Deploy virtual machines or a firewall. And thanks to YaST, the most comprehensive and powerful administration tool in the industry, you can manage your environment with ease.
